Profile.

I have designed interfaces and digital products since January 2021, working on enterprise platforms for insurance, banking, logistics and public infrastructure. I turn manual processes and confusing internal platforms into tools that are easy to use, and I work closely with product and development so the design reaches production. I use AI agents and Claude Code to research, document and prototype in code. I also design and build WordPress sites and Shopify stores.

Experience.

UI/UX Specialist, enterprise projects

June 2024 to present

Sofka Technologies

I design interfaces for enterprise platforms. I own the visual system, with components and UI Kits in Figma, and I document styles and interactions. I deliver navigable HTML prototypes, 1:1 with Figma, as a reference for development.

- **UX/UI Practice Lead**: I run quality reviews and technical interviews, and I support the designers on the team.
- **Sura México**: led the UI for the policy quoting and issuing platform, with a responsive system, multi-role flows and ongoing support to development.
- **Summa**: full migration of the internal platform, with a design system, component library and HTML prototypes that act as the specification.
- **Metro de Medellín**: redesigned user and permission management, with simpler flows and better traceability.
- **Yappy**: designed the multi-device account enrollment flow, with a high-fidelity navigable prototype and microinteractions.
- **Logyca**: designed the inventory management platform, with animated prototypes.
- **Crystal**: designed the flow architecture, visual system and navigable prototypes from scratch.

UI/UX Designer, freelance

January 2021 to present

Health, retail and services clients

I design interfaces and visual systems, with navigable prototypes in Figma. I build and customize WordPress and Shopify sites: themes, sections and custom layouts. I work directly with each client.

Visual/UI Designer

January 2021 to November 2022

SanMarteam

I led the design of brand identities and web interfaces for several of the agency's clients.

Education.

Master in UX/UI Design
Nuclio Digital School · 2023 to 2024
